

# Polyurea coating for asbestos

## Project

Coating for asbestos encapsulation

## Date

June 2018

## Surface area

approx. 275 m<sup>2</sup>

## Customer

Old Shipyard Centre,  
Bridport, Dorset

## Project

Block of 18 garages with old and fragile cementitious corrugated roof tiles had numerous leaks. The customer's budget did not stretch to having the roof removed and replaced due the presence of asbestos.

REKU recommended a polyurea coating which completely encapsulates the asbestos as well as increasing the structural integrity of the roof structure. REKU first repaired all holes and cracked areas before priming and spray applying the polyurea coating.
